

The new **M583c sideboom attachment** has been designed specifically for the custom John Deere 1050K platform. This new, fully integrated sideboom has a low, compact design that provides balanced weight distribution for optimum lifting, operating control, and excellent visibility. It includes a high capacity pipelayer winch package controlled by a multi-functional, electronic joystick for all load, boom and counterweight functions.

For more information, please call **918-858-4234**.
