ROSEN Products

ROSEN develops and manufactures high performance polyurethane elastomers as an internal pipe coating for corrosive and erosive environments.

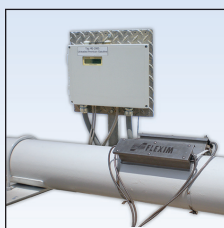

Efficient State-of-the-Art Pipeline Cleaning

- Highest cleaning efficiency
- Special solutions, e.g., black powder

- Explosion-proof versions
- Monitoring of cleaning-progress

Flexim

FLEXIM's HPI Flow Meters – specifically designed for the needs of the Hydrocarbon Processing Industry

The FLUXUS HPI meter combines previously independent and thus error prone measurement systems into one integral system. By measuring temperature, pressure and sonic velocity of the media flowing through a pipe, the firmware computes the fluids density and clearly identifies the liquid by comparing the measured

data with its internal library.
