

PRODUCT SERVICES

/// MIDWESTERN

ENGINEERING AND DESIGN

Our experienced engineers use Autodesk and PTC Creo software for all your design needs.

- Mechanical Design
- Structural Design
- Fluid Power Design
- 3-D Modeling
- Drafting

MANUFACTURING AND FABRICATION

Our 65,000 sq. ft. manufacturing facility with overhead cranes allow us to handle all types of jobs. From small production pieces to large, fabricated structures, our skilled personnel are trained and well equipped to produce quality products.

- **Certified Welders**
- **High Definition Plasma Cutting and Marking**
- **Oxy-Fuel Cutting**
- **HEM Saw**
- **Large Radial Drills**

ASSEMBLY

We offer a wide range of assembly services from prototype units to small run production units. Our technicians have extensive knowledge with mobile equipment, winches, hydraulics, and electro-hydraulics which allow them to properly assemble and test the following:

- **Mechanical Systems**
- **Industrial Units**
- **Fluid Power Systems**
- **Mobile Equipment**

COATINGS

Our certified painters provide quality finishes for heavy equipment, industrial units, offshore products and fabricated production parts.

- **Painting**
- **Sandblasting**
- **OEM Finishes**
- **Specialty Coatings**

/// MIDWESTERN

Midwestern Manufacturing Company has been in business for more than 60 years. In addition to our pipeline product offerings, we also provide the following services:

- **Engineering and Design**
- **Manufacturing**
- **Fabrication**
- **Final Assembly**
- **Coatings**
